

Securing Today for a Profitable Tomorrow

Premier Line™

58Khz Electronic Article Surveillance Systems

Variety of Styles Available

Premier Line is a family of feature rich Electronic Article Surveillance systems compatible with all 58Khz acousto-magnetic tags and labels.

Premier Line's clear acrylic composition provides a very stylish appearance that accommodates the needs of fashionable retailers. And their slim design results in an aesthetically pleasing streamline appearance.

Premier is available in a variety of attractive styles to offer aesthetic choices to every retailer.

Popular Premier Line has been improved to offer retailers new features with the same classic look.

High-Fashion design and acrylic composition for a most stylish appearance.

Fully compatible with all acousto-magnetic tags and labels.

EVERY RETAILER DESERVES STYLISHLY DESIGNED EAS PEDESTALS

Digital Signal Processing Technology

WG systems are designed using only the most advanced and proven DSP technology on the market. Implementing reliable technology ensures retailers are investing in products that provide the most precise detection capabilities to maximize their profits.

Features

- ◆ High End, Sophisticated, Attractive.
- ◆ Great detection range.
- ◆ Patented noise cancellation technology.
- ◆ Alarm volume control.
- ◆ Jammer detection
- ◆ Optional External Alarm with Audio.
- ◆ Optional Digital Tool for synchronization and tuning.

One Size Does Not Fit All

Recognizing that one design will not satisfy every location, WG developed the Premier Line to satisfy a variety of applications needs.

- ◆ **Premier Guard** is our base system that will detect tags up to 1m (3 ft) on either side of the pedestal.
- ◆ **Premier Pro** extends entrance coverage up to 1.4m (4.5 ft) on either side of the pedestal.

Flexibility in Configuration

Flexibility was of primary concern in improving the popular Premier Line. Understanding the nature of retail layout freedom and conformity to customer needs led WG into developing a product that would not limit egress design. For very large entrances, multiple transceivers provide adequate coverage. For multiple entrances of varying sizes, different Premier models may be mixed within the same establishment without synchronization concerns.

DigiTool (Optional)

Premier may be tuned with either a handheld remote tuner or with DigiTool, a windows based software program that facilitates synchronization and tuning over a convenient USB port.

Anti-Jammer

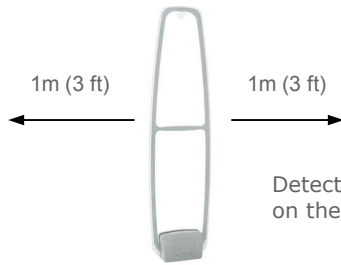

This feature detects jamming signals and sounds an alarm.

Premier is a Green Product

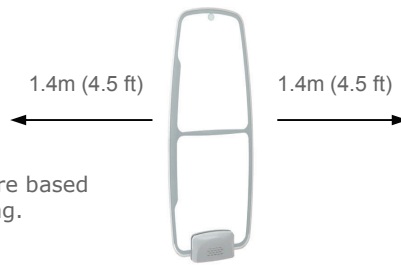

In keeping with environmental concerns, Premier is **RoHS** compliant and is also designed for low power consumption.
