

Securing Today for a Profitable Tomorrow

Lynx™

High Performance Deactivator With WG Reliability

Lynx is a distance deactivator designed for deactivating 58Khz acousto-magnetic labels with unsurpassed performance. Designed for flush mounting into the countertop, Lynx improves throughput by quickly scanning and deactivating labels in all orientations. As a distance deactivator, the label need not come in contact with the product; simply passing it over the deactivator is all that it takes!

Rapid scanning translates to improved throughput at the checkout stand.

Optional POS link protects against unauthorized use.

Distance Deactivation Ensures High Throughput & Efficient Customer Service

Performance Plus

High throughput, simplicity and a subtle presence make Lynx a very user-friendly tool. Flush mounting conserves space, allowing for ease of merchandise movement over the counter. Simplicity means no buttons to push and no lights to look at, just a distinctive sound indicating the presence and deactivation of the label. High throughput means the customer is efficiently served and the delays normally experienced by competitor products are easily avoided.

Features

- ◆ Flush mounting conserves countertop space.
- ◆ Distance deactivation of 58Khz labels.
- ◆ Intuitive plug and play.
- ◆ Distinctive feedback sound.

Lynx is a Green Product

In keeping with environmental concerns, Lynx is RoHS compliant and is also designed for low power consumption.

Preventing Unauthorized Use

Lynx is installed in a permanent fashion and is therefore always accessible whether the register is manned or not. Prevention of unauthorized use is ensured with the optional Data Cord module. This module interfaces Lynx to the POS register, where the user can enable/disable the deactivation function right from the register.

Specifications

Deactivation Range	
Horizontal Orientation:	8cm (3.2")
Vertical Orientation:	5cm (2")
Regulatory:	FCC CE (In process)
Physical (LxWxD)	
Antenna	35mm x 113mm x 105mm 13.8" x 4.4" x 4.1" Weight (TBD)
Controller	275mm x 190mm x 140mm 10.8" x 7.5" x 5.5" Weight: 3kg (6.6 lbs)
Electrical	
Voltage:	115/230 ±10% @50/60Hz
Current Draw:	5A Max

Product Codes

Lynx with Controller	WG LynX
Data Cord (Optional)	(TBD)
