

New Wi-Fi 58Khz EAS Technology

"Introducing the latest in 58kHz EAS technology—powerful, efficient, and cost-saving. Unlike competitors, our system requires no dedicated power line, cutting out expensive electrical work and saving you thousands. Upgrade to smarter security today!"

Premier Guard is a line of EAS systems designed for both aesthetics and performance, compatible with all 58 kHz AM tags and labels. It portrays a unique flair with its sleek look and accommodates retailers with an eye for presentation. The Premier Line offers a selection of clear acrylic pedestal designs with three different color trims (White, Gray and Black). It is available in both standard and XL sizes, differing in detection range.

Ad Guard is a feature rich detection system compatible with all 58 kHz AM tags and labels. Ad Guard's sleek design not only provides a very stylish and aesthetically pleasing appearance but also offers the retailer an avenue to increase sales. Ad Guard is designed to include space on both sides of the pedestal for advertisement panels or laminate finishes, which are easily changeable to meet current marketing promotions or design needs.

Exquisitely designed for every decor, Door Guard delivers stylish distinction from other EAS systems. Diamond Door Guard is available in gray and black, and upon customer request, customizable with your company logo or any other decorating themes. With attachment to the door frame or glass store front and not the floor, Door Guard creates a comfortable shopping experience.
